EDUCATION

Carnegie Mellon University
Masters of Human Computer Interaction - 2014
Bachelor of Science in Information Systems - 2013

PROJECTS

Waiter Please! Mar - May 2014
Our team, for our Interaction Design Studio course, created a video sketch for a ubiquitous computing system to be used in a crowded environment. We designed a restaurant and bar system that detects when a glass or pitcher is almost empty, and indicates to the people at the table where the nearest waiter is

Autonomous Car Interactions Feb - Mar 2013
Our team, for our Human Robot interaction course, researched and designed interactions for automated cars. We created the concepts of an interactive eye around the bottom half of a self-driving vehicle, as well as a vibrating device that would be attached to a stop sign or object near the intersection.

Pufferfish Aug - Dec 2013
Our team, for our Biologic course, were tasked with selecting an organism, researching various aspects about it, and then applying features of that organism to architecture. We researched the pufferfish and designed a responsive shading component based on our findings

HOBBIES & INTERESTS

Football	Yoga
MMA	Digital Fabrication
Cooking	Interaction Design
Swimming	UX Design
Reading	UI Design
FIFA	Front End Design

EXPERIENCE

Ziba Design Nov 2014 -
I get to work alongside amazing multidisciplinary teams. Areas I have worked include: digital user interfaces, mobile prototypes, web strategy, user experience architecture, design research, and branding. Clients I have worked with include: FedEx, Rubbermaid, Endeavour Capital, and Palo Alto Health Sciences

NASA Jan - Aug 2014
Serving as the Technical Lead for our MHCI capstone project, on a team of 5 interdisciplinary students. We worked with NASA to understand how astronauts and engineers search for necessary tools and carry out procedures, in order to design a smarter, context-aware system that will increase their work efficiency

GASP Mar - May 2014
Our team designed and built an interactive air quality display for our clients GASP. The display pulls the current air quality index in the Penn Ave Pittsburgh area, and reveals that information in a visually pleasing manner for any passerby

Clickbrands Jun - Oct 2013
Aided in the design and implementation of apartmentreviews.net and apartmentlinks.com as a Front End Designer. Created wireframes, interactive mockups, and oversaw the front end migration to our Ruby on Rails platform
